

Close more property deals without dropping a single lead.

One workspace that answers every WhatsApp, listens to every call, and shows managers exactly where each deal stands — powered by AI, approved by people.

WhatsApp AI

Call Intelligence

Live Dashboards

THE PROBLEM

Deals don't die on the call — they die in the follow-up gap

Slow, scattered follow-up

Leads message on WhatsApp at 11pm. By the time an agent replies, a competitor already did. Speed decides who wins the sale.

Every channel is separate

WhatsApp here, phone calls there, a spreadsheet somewhere else. Nothing is joined up, so context is lost between touches.

Calls vanish after hanging up

What the buyer said, the objections raised, the promised next step — all locked in the agent's memory, never captured or coached.

Managers fly blind

Team leaders chase agents for updates in spreadsheets. No live view of pipeline, activity, or why deals stall.

WHY NOW

The conversations already happen — now AI can finally read them

90%+

of property buyers in SEA start on WhatsApp, not email or web forms

5 min

response window before a lead's interest drops sharply

Now

AI can transcribe, understand and draft replies in seconds — cheaply

The gap is no longer technology — it's tooling

Agents have the AI models. What they lack is a workspace that plugs those models into the messages and calls they already handle every day. That workspace is Callio.

THE SOLUTION

Callio: one copilot across the whole sales conversation

Three connected pillars, one shared view of every lead.

ENGAGE

WhatsApp AI

Unified inbox with AI-drafted replies for every incoming message — sent only after the agent approves.

UNDERSTAND

Call Intelligence

Every call transcribed and analysed: sentiment, objections, buyer stage and the next best action.

MANAGE

Live Dashboards

Agent and team-leader views of calls, leads, follow-ups and appointments — updated in real time.

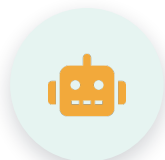

Human-in-the-loop by design: AI does the drafting and the listening — the agent always makes the final call.

Answer every WhatsApp lead in seconds

One shared inbox

All lead conversations in a single place — full history, always on hand for whoever picks it up.

AI-drafted replies

Callio reads the thread and the lead's profile, then drafts a reply in the right tone, instantly.

Agent approves & sends

The agent edits or confirms with one tap. Nothing goes out without a human — no bot going rogue.

Aisha • Lead — Menara Vista

Is the 3-bedroom still available? What's the price?

AI DRAFT

Yes! The 3-bed is available at RM780k. Want to view it this weekend?

✓ Approve & send

Edit

Turn every phone call into structured intelligence

Upload a call recording. Callio transcribes it, labels each speaker, and extracts what matters.

Sentiment & buyer stage

Reads how the buyer feels and where they are in the journey — warming up, deciding, or ready.

Objections, captured

Flags exact objections (price, location, timing) with the buyer's own words as evidence.

Next best actions

Recommends the concrete follow-up step so nothing is forgotten after the call.

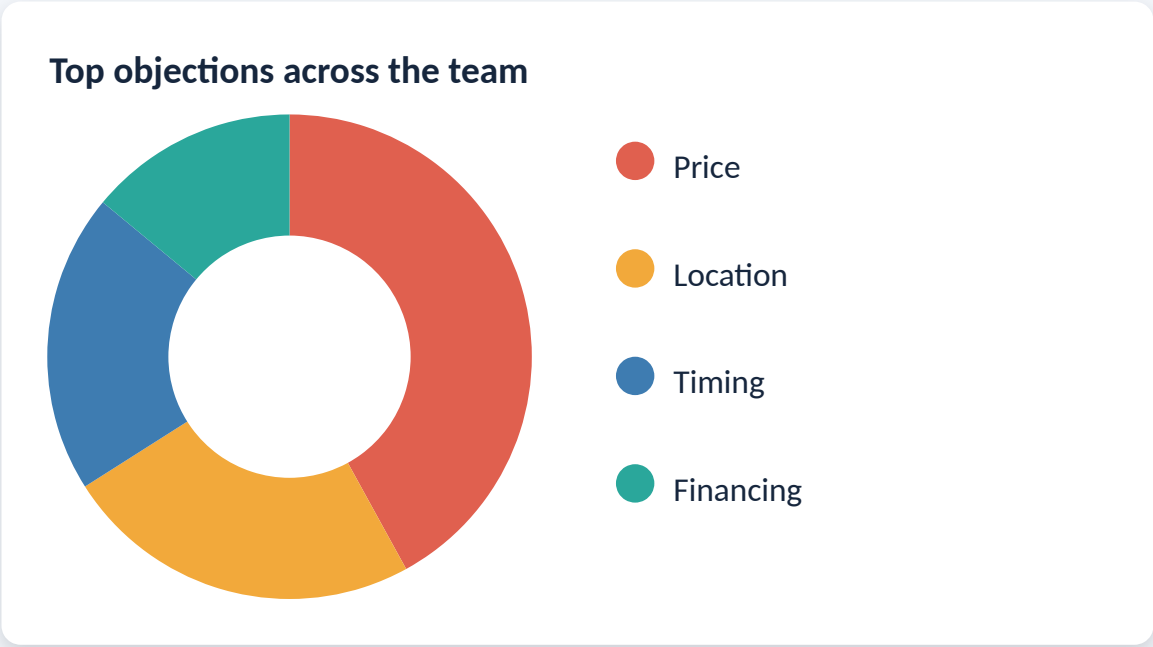

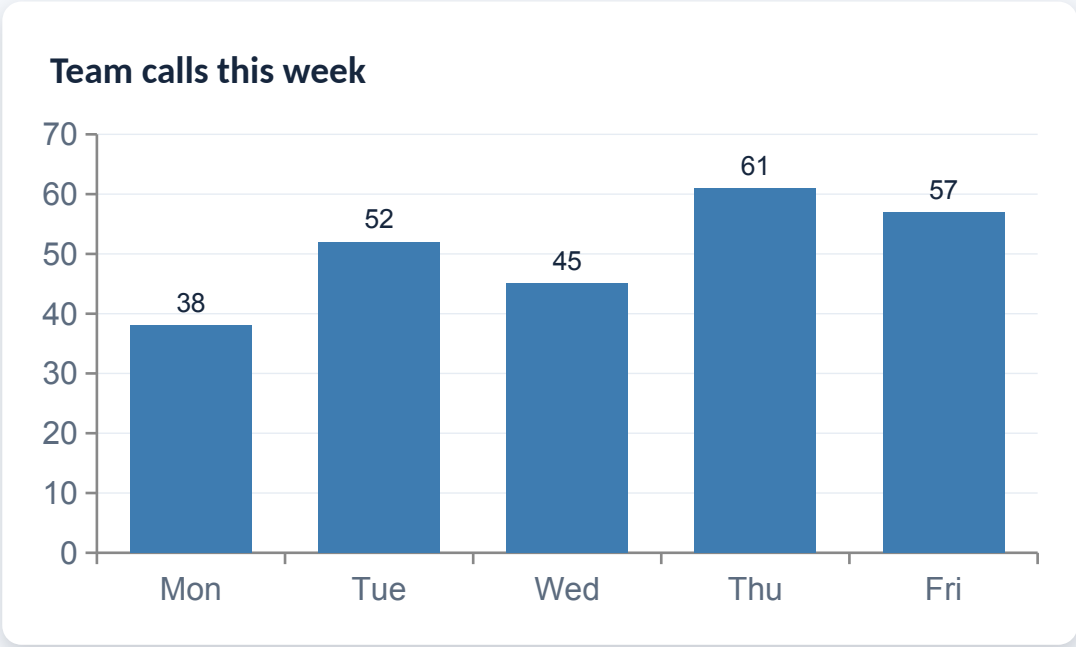

Preferences & summary

Pulls out budget, location and must-haves into a clean summary attached to the lead.

Why it matters: coaching that used to need a manager sitting in on calls now happens automatically, on every call.

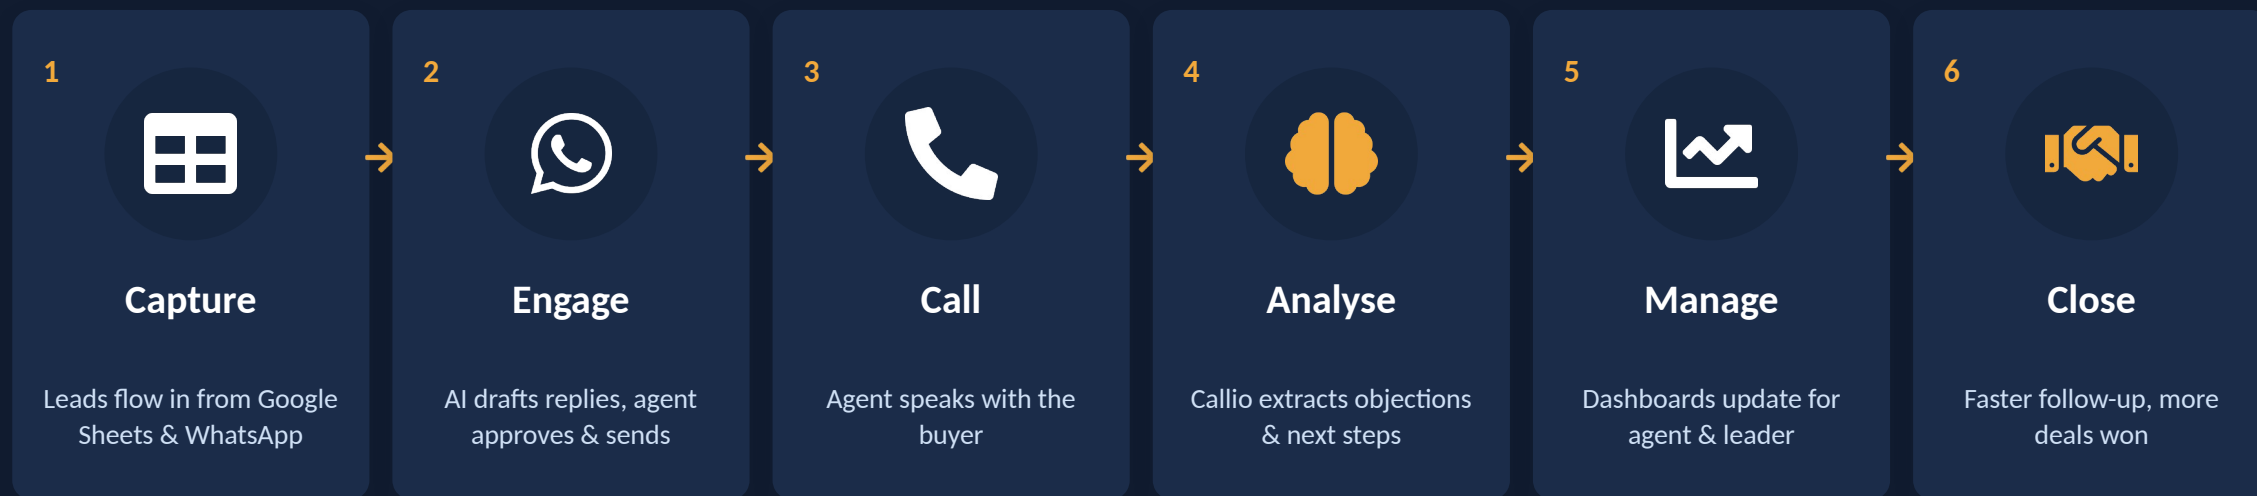

Give managers a live line of sight into the team

Illustrative dashboard — agent view rolls up into a team-leader view with a per-agent breakdown.

HOW IT WORKS

One loop, from first message to closed deal

The compounding advantage: every call and chat feeds the lead record and the dashboards — so the team gets sharper with each interaction, not just busier.

What Callio changes for the business

Faster

response to every lead —
minutes, not hours

Zero

leads lost to forgotten follow-ups

100%

of calls captured & coached
automatically

1 view

of pipeline for every manager,
live

The bottom line

Agents spend their time selling, not admin. Every lead is worked; every call is remembered; every manager can see the pipeline. Small gains in response time and follow-up convert directly into more closed property deals.

Not another CRM — a copilot built for how agents actually work

Today's tools

- ✗ Generic CRM built for desktops, not chat
- ✗ Calls disappear into voicemail history
- ✗ Follow-ups depend on memory & sticky notes
- ✗ Managers report on last week, not right now

The Callio way

- ✓ Lives inside WhatsApp — where buyers already are
- ✓ Every call transcribed, analysed & remembered
- ✓ AI drafts & flags follow-ups; nothing slips
- ✓ Managers see live pipeline & objection trends

Our moat: human-approved AI that turns real conversations into a compounding memory of every lead.

WHERE WE'RE HEADED

From copilot to autopilot

LIVE

Now

WhatsApp AI replies, call intelligence, agent & leader dashboards

BUILDING

Next

Auto follow-up scheduling, richer lead scoring, deeper CRM sync

VISION

Later

Multi-channel copilot & predictive deal-closing across the whole team

Callio closes the follow-up gap — and turns every conversation into a closed deal.

Let's put an AI copilot in every property agent's pocket.
